RESTORx — Company Profile

RESTORx DKI is actively involved in Property and Content Damage Restoration throughout Western Washington. Our commitment to our customers has always been to provide the hardest working, most well trained employees on our jobs. Training is critical to meet these goals and **RESTORx** has the most highly trained staff with certified technicians in every aspect of our business. In every business where human labor is involved, training and certification directly translate into knowledge of how to do the job correctly. This in turn translates into superior customer service and ultimately, a total job cost savings. At **RESTORx** we will quickly analyze the problem, give a professional assessment of the damage; by providing an accurate and itemized estimate free of charge, finish the job on time, and follow up to assure total satisfaction.

Our challenge is to create more efficiencies and benefits for our customers, while at the same time, reducing or at the very minimum, holding the line on costs. **RESTORx** has added a number of systems and equipment to our operations to enable us to be more efficient and offer a savings, by not having to use outside vendors for work that we can complete ourselves. As the restoration industry changes, so do we, to make sure that we are providing the best service possible. We stay up to date on the most recent and innovative concepts when it comes to new drying and cleaning techniques.

RESTORx added Mold Cleanup services in 1995 to meet a growing demand for this service, and has become an industry leader when it comes to understanding and dealing with mold remediation in private and public buildings. We work with Industrial Hygienists, Laboratories and Consultants to expedite any mold cleanup project and have been providing Mold Mitigation and Abatement Services with documented results and satisfied clients for far longer than any other company in the region. In response to our changing industry we have expanded our services to include Bio-Hazardous Cleaning and Disposal, Death and Trauma Scene Cleanup and Tear Gas Cleanup.

RESTORx joined **DISASTER KLEENUP INTERNATIONAL (DKI)** in 2006 as a Network Member. **DKI** is North America's leading network of quality, independent property damage restoration contractors. By virtue of this membership, we can utilize **DKI's 24 Hour Call Center**, it's **DIAMOND Claims Tracking Technology**, and other tools to enhance our ability to serve our insurance and property management customers.

RESTORx has a customer list including most major insurance companies, various school districts, hospitals, property management companies, building owners, homeowners, and general contractors involved in Fire and Water Damage Restoration.

We hope that by providing excellent, professional, CARING service you will consider **RESTORx DKI** as your Preferred Disaster Restoration Company!
